

DCNORRIS

MODEL 990 CAN CRUSHER

The DCN Model 990 Can Crusher is a heavy duty table top machine capable of crushing the majority of domestic and industrial cans to approximately 20% of the original size. The operation is as simple as opening the lid, dropping in the can, closing the lid and the can is crushed and ejected out of the exit chute, taking a few seconds. By using the Can Crusher, payback can be achieved within 12 months by selling the heavier crushed cans as scrap instead of paying to take away the whole cans!

Features

- Manufactured in stainless steel and food approved plastics
- Capable throughput of 200-300 cans an hour
- Maximum can size - 160 diameter x 260mm high
- Compressed air required for operation
- Air consumption - 240 litres per minute at 6 bar
- Safety features are built into the machine rendering it inoperative should the lid be lifted
- Available with a stand or the unit can sit on any strong table
- Easy cleaning
- Manufactured in the UK

Available Options

- Stand Alone Support Table
- Can Crusher Stand
